Probes, hand-held meters, monitoring systems and
digital farm management for aquaculture

More than 35 years of delivering **intelligent equipment** for the aquaculture industry

D30 / D40

Pacific DO or LDO

- 📌 Oxygen in mg/l or % sat
- ✳️ Submersible up to 50 meters

I01FS / I01FSP

Salinity probe

- 📌 Salinity w/ auto temp compensation
- ✳️ Adaptable with Pacific or any 4-20 mA device

K01XX

Redox or pH probe

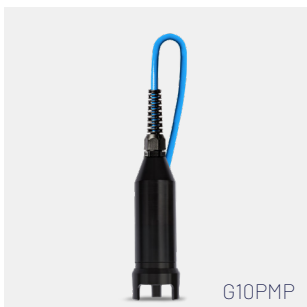

- 📌 Choose redox or pH
- ✳️ Light duty for aquaculture and heavy duty for waste water

F01

TGP Probe

- 📌 Total Gas Pressure and temperature
- ✳️ Mainly for nitrogen, to prevent gas bubble disease

G10PMP

CO₂ probe

- 📌 Carbon Dioxide
- ✳️ Use with calibration stirrer

D061

Temperature probe

- 📌 Temperature
- ✳️ Measures in water and air. Range from -5 to +45 C

D033

Model 420 DO

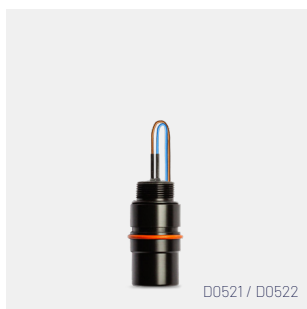

- 📌 Oxygen in mg/l or % sat
- ✳️ For 2-wire 4-20 mA transmitter. Standard, High Range or Flange

G20L

Ozone sensor

- 📌 Ozone
- ✳️ Range 0-0.8 mg/L

D0521 / D0522

Ocean probe

- 📌 Oxygen
 - ✳️ Standard depth up to 2000 m. On request up to 7000 m.
- 📌 Measures ✳️ Features

WATER QUALITY PROBES

Our probes measure and monitor many different parameters. With advanced sensor technology we provide accurate and real-time data, essential for maintaining optimal conditions in aquaculture, wastewater treatment plants and other aquatic systems

PUT YOUR TRUST IN OXYGUARDS PROBES

We deliver accurate and precise measurements, and our probes are sturdy and designed to withstand harsh environmental conditions.

- We have probes for measuring in air, gas and all types of liquids.
- Temperature ranges from -5 C to +45 C (23-113 F).
- Reach depths up to 7000 meters with temperature pressure compensation.

SPECIAL REQUEST?

Need a different cable length or a higher or lower range? We can custom design most of our equipment. Please ask!

SEE OUR ENTIRE COLLECTION AT OXYGUARD.COM

H05D0-25

Polaris C D0

- 📡 Oxygen and temperature
- 🌐 Bluetooth, online connection, NFC tags.

H05LD0-25

Polaris C LDO

- 📡 Oxygen and temperature
- 🌐 As Polaris C but with low maintenance LDO sensor

H08-25

Polaris C TGP

- 📡 Total Gas Pressure and temperature
- 🌐 Mainly for nitrogen, to prevent gas bubble disease

H09-25

Polaris C Salinity

- 📡 Salinity
- 🌐 Automatic temperature compensation

H04P-25

Polaris C pH

- 📡 pH
- 🌐 Light duty for aquaculture and heavy duty for wastewater

H04R-25

Polaris C Redox

- 📡 ORP / Redox
- 🌐 Determine the oxidizing reduction potential in industrial water

H03-25

Polaris C Maxitemp

- 📡 Temperature
- 🌐 Measures high temperature up to 60 C (140 F)

H02A-25

Polaris C Atmosphere

- 📡 Barometric pressure, oxygen and temperature
- 🌐 Measures in air/gas

G02-25

Polaris C CO₂

- 📡 Free dissolved CO₂ directly
 - 🌐 Measurements are not affected by carbonates etc.
- 📡 Measures 🌐 Features

HAND-HELD METERS

Take spot measurements in various locations and obtain a clearer understanding of the water conditions. This makes you able to quickly adjust the water quality

GAIN ACCURATE RESULTS

Our hand-held meters ensure monitoring and controlling of the parameters in aquaculture, wastewater treatment and other industries.

- Get the OxyGuard quality right at your hand. Designed to be used for fish farming, research, wastewater treatment and more.
- Hand-held meters are waterproof, can withstand tough conditions and are built to last.

TAGS

Take spot measurements with tags and Polaris C and retrieve important data quickly.

OxyGuard®

Pacific C11

- * Connect up to 20 probes digital/analogue – wired/ wireless to one unit. With datalogger and touchscreen

Commander Pacific C01

- * Combine all your Pacific's into one system for customized control and comprehensive oversight

Marlin+ B11P

- * Single Channel transmitter. Use with your choice of probe

Pacific SMS unit C11PSMS4

- * Receive Pacific system alerts and notifications on your phone

Pacific web C11PWEB

- * Access system overviews, probe details, logs, graphs, and make changes remotely

Convoy Pacific C02CONVOY

- * Control, monitor and record the dissolved oxygen of tanks when transporting livestock

Atlantic B071

- * With 4 relay outputs. Measures DO and temperature

Pond master B081

- * A compact design that holds advanced technology used for individual ponds

D205 Display B051

- * 4-20 mA signals for most common ranges and parameters

* Features

MONITORING SYSTEMS

Designed to assist fish farming operations. Our products include measurement transmitters and monitoring systems, along with tools for assessing water quality during the transportation of live fish

FARM MANAGEMENT AND CONTROL SYSTEMS

Whether you have a small fish farm or operate a large facility, we have the equipment to suit your needs. We can supply simple monitoring equipment right by your tank or assist you in large remote operations.

With our Commander Pacific systems, you can upscale as you grow and customize the equipment to fit your increased demands.

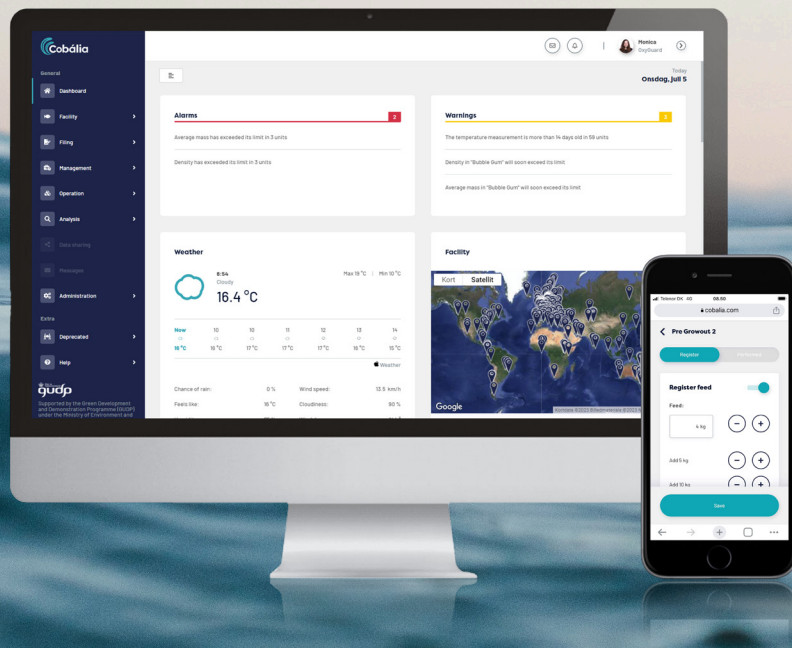

We provide full service for all equipment, and our highly skilled technicians can assist you in the setup or if a question or problem occurs.

OxyGuard®

DIGITAL MANAGEMENT

Cobália is a highly customizable aquaculture platform that combines information, people, livestock, and hardware to accelerate growth on your fish farm

SAVE TIME

- Task management
- Keep track of all your data in one place
- Access from anywhere
- Autogenerated reports
- Growth curves and yield production

INCREASE EFFICIENCY

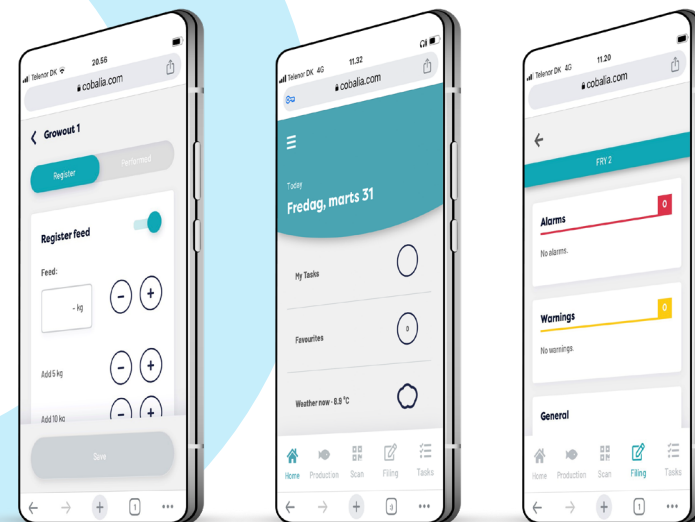

- Optimal growth
- Track improvements and production
- Improve yield

SAFEGUARD YOUR STOCK WITH DIGITAL SURVEILLANCE

- Access data everywhere
- Notifications
- Optimal conditions 24/7
- Keep track of tasks

IMPROVED WORK CONDITIONS

- A daily overview
- Assign employees to tasks
- Empower your teams
