

## How to use OxyGuard's CSV Data Analysis files.

1. Depending on the version of Excel installed on your computer (365 or 2013) download the file suitable for you.
2. Create a folder on your computer and copy data files from the Pacific unit to that folder
3. Open the CSV file and select "Import CSVs"

4. Chose the folder you created in the second step (**do not open the folder!**) and press "OK"

5. View data
